<p><b>3- Greater justice in the taxation system</b></p> <p>What do you intend to do so that the taxation system stop widening the gap between rich and poor Canadians?</p>	<p>Phase in a new Child Benefit. This benefit, modelled on the existing Canada Child Tax Benefit, will expand in phases to \$5,000 a year per child, and consolidate the current piecemeal system of benefits and tax credits for children into a single, better, non-taxable monthly cheque to parents.</p> <p>We will change that and bring a more balanced approach to Ottawa. The New Democrats will:</p> <p>The New Democrats will not implement Mr. Harper's profligate, wasteful and unproductive corporate tax breaks. We'll restore a uniform 22.12% tax rate – what it was before the Martin and Harper governments began these giveaways.</p>

<p><b>5- Environment</b> If your party is elected to form a government, will you pledge to:</p> <ul style="list-style-type: none"> <li>• support the re-instatement of adequate funding of federal environmental programs;</li> <li>• support international initiatives calling for firm commitments to cut greenhouse gas emissions;</li> <li>• and ensure that Canada lives up to its international agreements, including meeting the legally binding targets agreed upon when Canada signed on to the Kyoto Accord?</li> </ul>	<p>Yes. Climate change is one of the most urgent threats facing our planet today. In Ottawa-Vanier voters are telling me that the traffic issue on King Edward Avenue is degenerating their quality of air. This is an issue where I will work very hard to rectify on a local, national and international front.</p> <p>To ensure a healthy Canada for future generations, we must move from a polluting economy to a sustainable one now.</p> <p>Science tells us that unchecked greenhouse gas emissions invite catastrophe—vanishing polar ice caps, rising sea levels, altered agriculture, massive deforestation, species extinctions, virulent diseases, extreme weather events, economic hardship. Faced with this conclusive evidence, successive governments have promised to act, but have failed to do so, allowing us to fall behind.</p> <p>Our Better Environmental Plan implements a new energy economy strategy and builds on the Climate Change Accountability Act that Jack Layton proposed and that was adopted by Parliament on June 4, 2008. This bill sets the target of an 80% reduction in greenhouse gas emissions by 2050, and provides the enforcement tools needed to do the job.</p> <p>Our plan introduces Canada Environment Action Bonds to raise capital for the plan's goals and we'll make polluters pay for the real costs of pollution through a cap-and-trade system that rewards big polluters who reduce emissions, and punishes those who don't.</p> <p>We will also continue our fight to halt new tar sands development until emissions are capped.</p>

<b>Questions from the PSAC</b>	<b>Trevor Haché's answers</b>
	<p>This election, my party has pledged \$8 billion over four years to fuel the creation of these “green-collar” jobs and industries that includes help for the auto industry to design and produce environmentally friendly cars and trucks. Our plan would also retrain workers for these jobs in the environmental industry and invest in research and development tax credits.</p> <p>We will help families make the transition to a sustainable economy with a \$750 million green-collar jobs fund and ensure greener homes and cities with average of almost \$1 billion a year for public transport and an energy efficiency retrofit program. As well, we will ensure that environmental programs are adequately funded, and that Canada lives up to it's international obligations.</p>
<p><b>6- Anti-scab legislation</b> Did you vote (or would you have voted) for or against the anti-scab bill tabled in 2007? What action would you take to have an anti-scab bill passed at the federal level?</p>	<p>New Democrats voted in support of anti-scab legislation and have worked hard with labour to develop and promote this legislation. New Democrats will continue to push to have anti-scab legislation passed in the new parliamentary session.</p>
<p><b>7- Working in French in the Public Service</b> What do you intend to do to promote the use of French in the Public service, particularly in the National Capital Region?</p>	<p>New Democrats support all efforts to promote the use of French in the Public service, particularly in the National Capital Region, and we will work with PSAC and other interest groups to develop the best strategies to ensure that French language rights are protected and promoted.</p>
